

TX SERIES HIGH-SPEED CONTACT GRILLER

TX Series

Prince Castle's TX Series Toaster uses a method of heating bread products through direct contact with a heated surface. Also known as "bread grilling," this process carmelizes sugars on the open face of the bun without drying out the bread. The result is bread that is hot and moist with a "fresh out of the oven" presentation.

Prince Castle's TX Series Toasters are designed for "barrel run" toasting--where high power performance ensures 10-second toasting. The TX toasts up to 2000 buns per hour and has a unique ergonomic design for easy loading. The TX series also features separte heel and bun crush controls to accomodate the varying bun sizes. The Teflon sheets prevent sticking during the toasting process and are very easy to clean.

STANDARD FEATURES
